

Camera On a Stick (COAS)

The COAS is a professional tethered pole camera system consisting of an IR-ready camera mounted at the tip of a telescoping pole extendable to ~16.7 feet and a portable display with a built-in digital video recording function. The pole is made of light-weight graphite tubes embedded with coiled cable providing smooth and un-interrupted pole operation. This product is ready to serve law enforcement and other professionals who have the need of investigating hard to reach space such as attics and crawl spaces, and viewing around corners, under and atop vehicles, over walls, and on rooftops. The camera operates continuously for 3 hours in daylight and 1.5 hours in total darkness. Recording duration is much longer and usually limited by the capacity of the SD memory card.

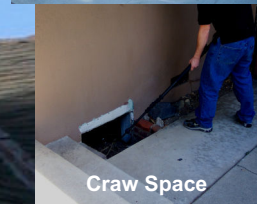

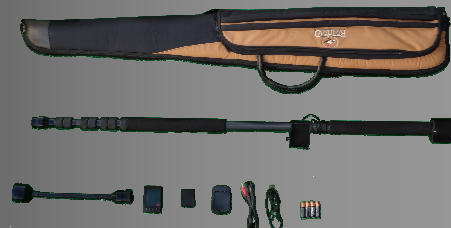

- ◆ Fit in the Trunk of a Passenger Car
- ◆ Color Camera with Built-in IR LEDs
- ◆ Telescoping Graphite Pole Extendable to ~16.7 feet (5.0 m)
- ◆ Camera Attached to Pole Through Flexible, Articulating Neck
- ◆ Ultra-portable Monitor/DVR
- ◆ Smart Video Recording at Preprogrammed Times or Activated by Motion
- ◆ Up to 3 Hour Continuous Camera Operation (IR-LED Off)
- ◆ Video Output to Larger Monitor or PC
- ◆ Optional Storage Up to 16 GB in External Micro SD

Specifications

Pole Camera (Physical):	
Length	Pole: 16'7" Extended, 4'1" Retracted; Camera: 12"
Weight	4.3 lbs, Including 4 AA Batteries
Camera Specs:	
Imaging Chip	1/3" Color CMOS; Effective Pixel Size 510x492
Resolution	380 Lines, NTSC Compliant
Minimum Illumination	0 LUX
Field of View	60°
Monitor/DVR:	
Monitor Size	2.5" TFT LCD
Display Resolution	480x240
I/O Port	Video In, Video Out, Shared Power/USB
Electrical Input	5 VDC
Recording Format	Support 720x576, 720x489, 640x480, 320x240 Resolutions, in Video (.avi) and/or Audio (.mp3)
Recording Mode	Regular, Motion Activated, and Timed Recording
Storage	Internal: 128 MB; External Micro SD: 256 MB~16 GB
Battery:	
Camera	4x AA Batteries
Monitor	Lithium-Ion Battery Pack, 1300 mAh (Rechargeable)
Battery Charger	Included (for Li-Ion only)

The system includes:

- 1x Carrying Bag
- 1x Color camera w/IR LEDs
- 1x Long pole, 4'1"-16'7"
